FOR IMMEDIATE RELEASE

Cisco Systems recognizes Integration Logistics as a Cisco Premier Partner

Bear, Delaware, February 23, 2010. Integration Logistics (www.IntegLog.com) has been recognized by Cisco Systems and has achieved the level of Cisco Certified Premier Partner. In addition, Integration Logistics has achieved Cisco's Express Foundation Specialization, the first technology specialization that integrates key solutions for Cisco routing, switching, wireless, and security products.

Integration Logistics achieved its first Cisco Partner status in May 2005. These additional Premier Partner achievements are a result of successful customer deployments, increased Cisco training certifications for Integration Logistics staff, and increased technology specialization that integrates key solutions for Cisco routing, switching, wireless, and security products.

Cisco Premier Certification recognizes and rewards partners that have achieved the Express Foundation Specialization. This foundational specialization expands technical competency in the integration of basic routing and switching, wireless LANs, and security technologies. In addition, Premier Certified Partners have integrated a basic level of Cisco Lifecycle Services into their offerings and have demonstrated a measurably high level of customer satisfaction.

"We are proud of the Integration Logistics team for achieving this advanced recognition by Cisco Systems," stated Ken Schafenberg, CEO of Integration Logistics. "The Premier Partner status reinforces Integration Logistics' status as a premier provider of network services."

Integration Logistics began operations in 2005, and is headquartered in Bear, Delaware. Integration Logistics now has sales and support offices throughout the US.

###

"You will notice the difference!"™

About Integration Logistics, Inc.
